AI Waitstaff for the modern restaurant

Problem

Restaurants face labor shortages, rising costs, and high turnover — leading to slow service, inefficiencies, and lost revenue

Solution

AI-powered robots that automate order-taking, food delivery, and table service

Why Now? Why Restaurants?

- Restaurant costs are skyrocketing—automation cuts expenses and boosts margins
- AI advancements now enables voice-powered, error-free order taking
- Restaurant automation is growing at a 17% CAGR as adoption rises ¹
- Hospitals, malls, and factories have similar solutions but are dominated by costly, large players
